TITLE : AUTOMOTIVE PORTABLE WAX

ABSTRACT : **PURPOSE:** To facilitate a work to wipe and polish a surface to be wiped by containing a square wax wetting paper wet with an emulsion type wax composition and pulling off the paper through a groove formed in the central part of a cover part.

CONSTITUTION: A wax wetting paper 4 wet with an emulsion type wax composition is formed in the shape of a lateral oblong, and perforations 41 are formed at intervals of a given area. The paper is contained in a standing-upright state in a container 2 in a shape that the whole is wound in a roll-form state. The container 2 has an opening part 21 formed in its upper surface and is closed with a cover part 3. The cover part 3 has a groove part 31 approximately in a cross shape formed in the central part of the surface thereof, and the periphery of the groove part 31 is surrounded with an annular protrusion 32. During use, the terminal side of the paper 4 is picked out from the central part of a roll, and the paper is pulled out a given area at a time through the groove part 31 formed in the cover part 3 as it is cut at a perforations 41 part, the paper being used for wiping and polishing of the body of an automobile.
